VILLAGE OF DOLGEVILLE
WASTEWATER TREATMENT FACILITY
97 VAN BUREN ST.
DOLGEVILLE, N.Y. 13329

ATTN: DOLGEVILLE VILLAGE BOARD
RE: MONTHLY REPORT MAY 14, 2023 to JUNE 14, 2023

1. PERMIT COMPLIANCE FOR APRIL 2023

No permit violations to report.

2. MAINTENANCE

- Normal Preventive Maintenance
- Continued grounds cleanup (clearing brush along fence line)
- Beginning prep for painting and other summer projects

3. New Wastewater Treatment Plant Operator Trainee started on June 5. We have been training on operations and maintenance. Waiting on a call back from SUNY Morrisville on registering/being added to waiting list for a Basic Operations course this year. All classes are currently full. There are other approved schools for this training but much further away. Will continue to look for opportunities. In addition, New York Rural Water Association (NYRWA) will be sending books and other materials for their apprenticeship program.

4. FACILITY OUTDOOR LIGHTING (may have PO for meeting, waiting on revisions from electrician)

5. NYSDOL PUBLIC EMPLOYEE SAFETY AND HEALTH (PESH) – update

June 1 - another representative of DOL was at the plant for a review of 2 specific areas of safety not covered by the first visit, respiratory protection and confined space entry. This second inspection was part of the plant-wide evaluation that began in March. Reports on deficiencies will be sent to the Village later this summer. Due to the expected short timeline for compliance on some of the items, I have already resolved or begun completing some of the deficient program elements.

6. PRIMARY TANK CONCRETE REPAIR & STAIR REPLACEMENT (ARPA) – update

June 2 - NBRC was onsite to complete punch list work consisting of stair riser façade work. They are now 100% complete with the project.
