Re: January 2018 Monthly Report

Current Work:

- Most of our time spent plowing and salting over the past month
- With the aging fleet on hand keeping all snow removal equipment at 100% is proving to be a challenge
 - We have had many hydraulic line failures over the past month
- Christmas tree pick up has been completed
- Garage Fire
 - We had an electrical fire sometime between 12/31 late PM and early 1/2 resulting in loss of heat in the lower half of the garage and frozen water lines inside the garage
 - A new electrical panel was installed, and we have had no other electrical issues since the fire
- Repaired water leak in front of 22 Slawson St.
- Garage water service frozen outside of building on 1/10
- Salt usage:
 - Last YTD:409.20 tons
 - Current YTD:301.72 tons
 - With approximately 120 tons left on our allotment for the year
- **Loader replacement should still be considered**

Respectfully Submitted
