RE: July, monthly report

Submitted for August 20th, 2018

Water Plant

- 1) John Steciak completed work clearing a road on south side of reservoir so we have access to lay hoses for pumping and to clear brush and trees. I have ordered a I beam to build a bridge for access with small equipment (bobcat, or tractor).
- 2) DPW has repaired 2 water leaks recently one of which was going directly into the sewer. They done a test dig on Spencer St. and we hopefully have located the water main for the extension to Health Williams project.
- 3) Purchase and picked up the sand washer, need to purchase some hose and fittings to complete the set up.
- 4) Tractor quotes,
Charles Stahl, TYM 35 HP w/loader, aloud \$6800 trade in, final price \$18,700
Sharon Springs Garage, Kubota 25 HP / loader, aloud \$4,000 trade in, final price \$15,500
Clinton Tractor, New Holland 35 HP / loader, aloud \$7000 trade in, final price \$14,595
- 5) Filter cleaning was a standstill with very dry weather, hoping to have things in place to resand as fall filter cleaning starts

Attachments (available at office)

- 1) July water plant flow report.
