RE: May, monthly report

Submitted for July 16th, 2018

Water Plant

- 1) Reservoir cleaning went well, I figure we got 80 to 90% of mud removed. John Steciak was able to scoop a lot of the mud out and build a good solid road to the Reservoir. He was able to remove 3-4 large pine trees and use them as barricades to block ATV access to reservoir. Would like to have him clear a road on south side of reservoir so we have access to lay hoses for pumping and to clear brush and trees.
- 2) Prior to cleaning reservoir we had an issue with ATV getting into reservoir, in future we may need to purchase some concrete barricades to block new road.
- 3) Sand for resending filters, as it turns out we will be able to get sand from Hanson's in Poland for \$28.50 per ton.
- 4) Request permission to seek quotes or bids for tractor replacement as discussed at last year's budget meetings.
- 5) Filter cleaning is at a standstill with very dry weather.

Attachments (available at office)

- 1) June, water plant flow report.
- 2) Photos.

Respectfully, Neal A. Winkler, Water Plant Operator.
